

Water quality, we care

OneFlow® - Sustainable scale control

www.watts-oneflow.com

**WATTS®**

OneFlow® benefits

It helps **reduce** and **control scale**.

FOR YOU

FOR YOUR HOME

FOR OUR PLANET

EFFICIENT IN REDUCING EXISTING SCALE

OneFlow® media in the cartridge helps **attract hardness minerals** and **converts** them into **microscopic crystals**.

These crystals are **carried away by the water**, and no longer attach themselves to metal surfaces.

This keeps pipes, heating elements, taps, shower heads cleaner. **Soft scale** can be **easily cleaned off**.

Efficient
Eco-friendly

- The essential minerals **calcium** and **magnesium** remain in the water
- Soft scale is **simpler to clean**
- Bags of salt are **no longer needed**

- **Protects** piping
- Helps home appliances **last longer**

- **No added** salt or chemicals
- **No** electricity, no waste water
- **Better for the environment** compared to salt softeners

10 reasons to choose OneFlow®

Does not require salt or chemicals

Nothing is added to the water.

Compact and simple installation

OneFlow® is a compact device that can be installed vertically.

Existing scale removal

Removes portions of existing scale.

No electricity

OneFlow® works autonomously, no electrical socket is required.

Safe for pipes and appliances

Helps remove existing scale and controls new scale buildup.

Health

Healthy calcium and magnesium minerals remain in the water.

No waste water

No backwashing, which also means no unnecessary water consumption.

Minimal maintenance

No maintenance contract. Depending on the model, the cartridge or media must be replaced every two to three years.

Environmentally-friendly technology

No water wasted and no electricity or salt discharged into the environment.

Energy-saving

No unnecessary water consumption, and less scale build-up means the heating system works more efficiently.
